## FINE EVERGREENS

We have been growing Evergreens here for over 15 years. Our soil is such that it balls to perfection and we get a nice compact growth on our plants. We shear whenever desirable, and either transplant or root prune in time so as to insure good root-systems. All Evergreens listed include Balling and Burlapping.

## JANUARY 1914

REPORT OF THE  
COMMISSIONER OF THE  
LAND OFFICE  
IN RESPONSE TO  
A RESOLUTION  
PASSED BY THE  
LEGISLATURE  
MAY 1913

FIVE PER CENT

We have been asked to report on the growth of our industry, and to show the progress of our work. All the work done in the past year has been done in the interest of the public, and we have been able to show that the industry is growing, and that the public is getting the benefit of it.

### ARTS COMMISSION, White P.

#### JUNIPERS

Juniperus communis, L. var. horizontalis, Moench. This is the most common form, and is found in all parts of the country. It is a very hardy plant, and is able to grow in the most barren soil. It is also very useful for many purposes, and is one of the most valuable of our native plants.
